# “Tele-driving” A new approach to driverless cars

Koosha Kaveh  
CEO

2022

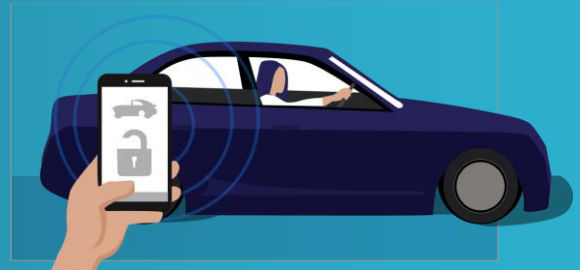

# DOOR TO DOOR PERSONAL MOBILITY IS CONVENIENT BUT EXPENSIVE & ROBOTAXIS WON'T BE HERE FOR YEARS

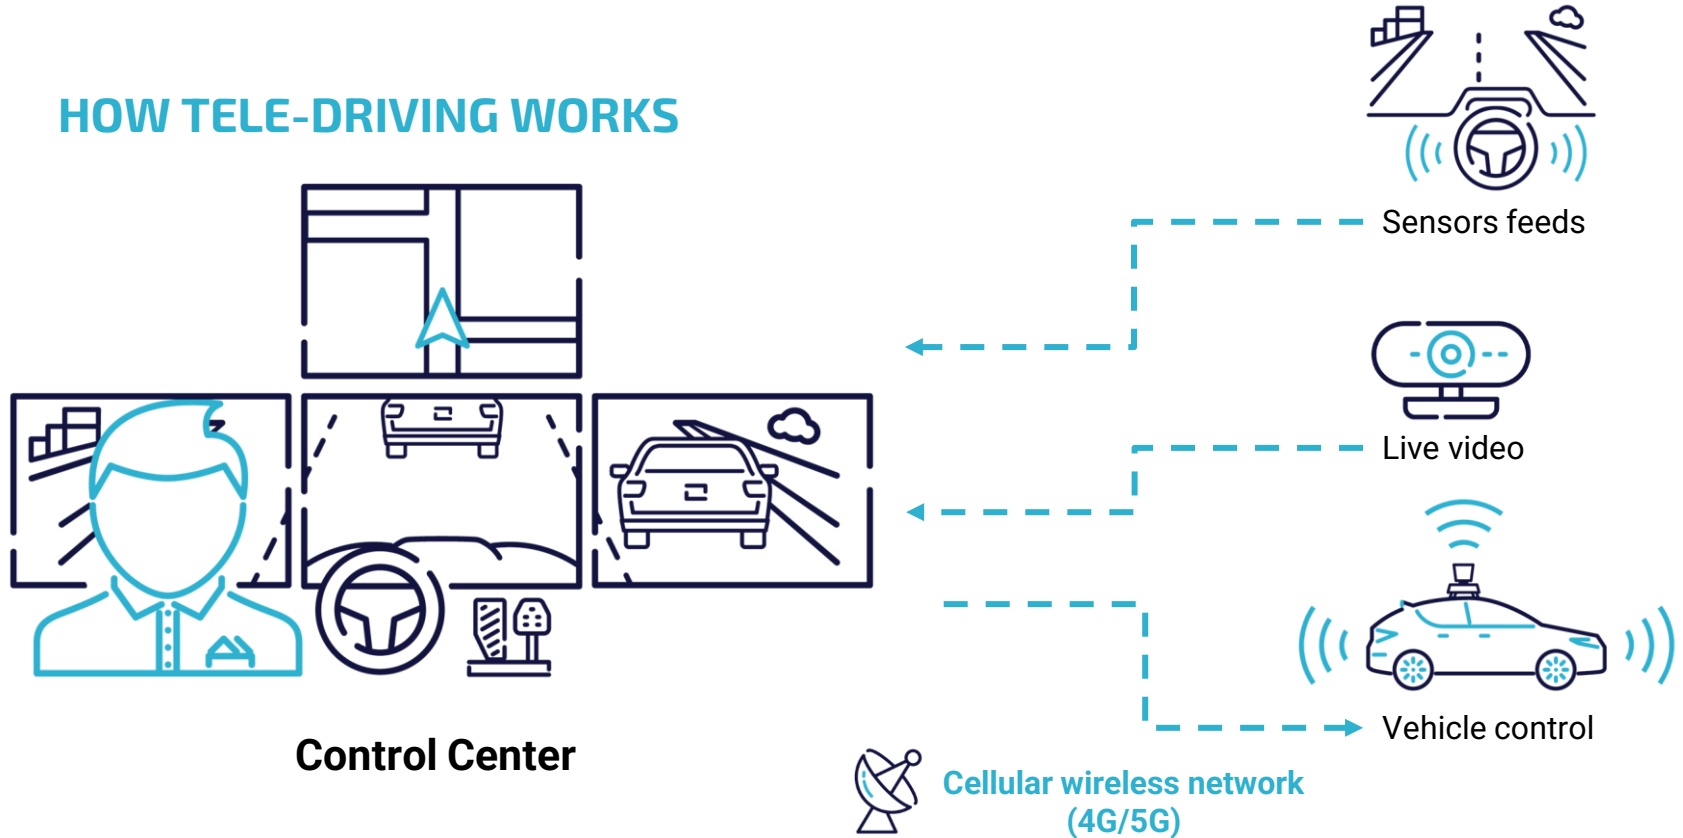

## SOLUTION : TELE-DRIVING

*Ride-hailing convenience with carsharing prices*

- 1 Request a vehicle & Immediate delivery
- 2 Unlock & Drive it yourself
- 3 Pull over and walk away

## HOW TELE-DRIVING WORKS

## TELE-DRIVING VS. AUTONOMY

Tele-driving is ready to scale now, autonomous driving isn't!

### Tele-Driving

### Autonomy

Low integration cost  
(camera only)

High integration cost  
(LiDAR, sensors, etc.)

Works in all weather  
and driving conditions

Still can't handle edge cases

Ready to scale everywhere

Only works in limited ODD

# Thanks!
